 154 Catharine Welsh. Executed at the Old Bailey, London, for drowning her child, at Fulham, 14th April, 1828. Extract from the News, weekly paper, 14th July, 1828.

"To the Editor of the News—

"SIR,

I venture to request that the "News, may be made the medium of the following remarks, illustrative of a science, which, in this country, only requires to be more known, to be more generally held in higher consideration.—

There having appeared in the public prints, some observations on the development of the skull of Catherine Welsh made by a Phrenologist, which were stated to be in contradiction with her character, a cast was obtained from which the above sketch was taken.

The organ of Philoprogenitiveness is large, but that of physical love and the whole region of the animal propensities very large, while that of the moral and religious sentiments, and of the reflective faculties are proportionally small.

This unfortunate woman had a child previous to her marriage, and had concealed the fact from her husband; he, on discovering the circumstance, left her, saying that he never would return until it was put out of the way. She took the child to the father, who placed it in the workhouse, but it was returned to her. Finding all other means fail, she resolved to drown it rather than lose the society of her husband, and all other social advantages.

It was given in evidence on her trial, that while walking near the place where the body was found, she was observed to suffer severely from conflicting feelings; and that she suckled the child and caressed it with all the fondness of a mother previous to the fatal occurrence.

I am, Sir,

Your very obed't Servant,

(Signed)

H. H. HOLM.

OF MASKS, SCULLS, AND CASTS OF HEADS,
COLLECTED FROM VARIOUS SOURCES
BELONGING TO THE BOSTON PHRENO-
LOGICAL SOCIETY.

M A S K S .

- 287 Lord Bacon. Taken from a statue. Of this Dr. Gall says, "the forms are larger than natural, but they indicate the source of the extraordinary genius of the philosopher. They present the largest endowment of the organs which constitute the highest intelligence. The head is for philosophy, what the head of Mozart and Rossini are for music, and those of Homer, Tasso, and Milton for poetry.
- 288 Dr. Park, of London. Organ of Locality largely developed.
- 289 Holman, the blind traveller, well known to the public by his volume of travels. The organ of Locality large.
- 290 Irish Traveller; celebrated for his great desire to visit foreign countries. He spends no time in any place which he visits, but merely passes through them. Organ of Locality very large.

- 291 Sir Isaac Newton. Probably taken from a statue. The organs of Locality and Number are largely developed ; also Size and Weight.
- 292 Zerah Colburn. Organ of Number large.
- 293 George Bidder. Number very large. He was remarkable for the faculty of calculation.
- 294 Vienna Calculator ; in whom Dr. Gall first discovered the organ of Number, which is very large.
- 295 Anne Ormerod. Tune extremely defective.
- 296 Large Time with very small Tune.
- 297 Haydn. Musical composer. Tune and Time both large.
- 298 Newkonn. Musical composer. Tune and Veneration very large.
- 299 Von Weber. Musical composer. Time, Tune, Ideality, and Wonder large. See Ed. Phren. Journal, p. 300, No. 14.
- 300 Tasso. Ideality and Wonder large. See Ed. Phren. Journal, No. 25, p. 487.
- 301 Oldham. An ingenious mechanic ; taken at the age of 36. Imitation and Constructiveness large.
- 302 Oldham taken at the age of 51 ; showing an increase of the organ of Constructiveness.
- 303 Garrick. Probably from a statue. A large development of Imitation, Ideality, and Mirthfulness.
- 304 Canova. Taken after death. The organs of Form, Size, Individuality, Locality, Constructiveness, and Ideality, and, in fine, all the organs necessary for the greatness of his genius, are largely developed.
- 305 Karner Vaider. Famous for cutting caricatures extempore with the aid of scissors only. Organ of Imitation, Mirthfulness, Form, Size, and Constructiveness are large.

- 306 Laurence Sterne. Organ of Mirthfulness is largely developed.
- 307 A young lady with large Eventuality.
- 308 Joannis (Français). Organ of Individuality large.
- 309 J. Horne Tooke. Individuality, Eventuality, and Language large; corresponding to the well known character of Tooke.
- 310 Voltaire. From a statue. The organs of Language, Mirthfulness, and Ideality are largely developed.
- 311 Jolin Muller. A German historian. Dr. Gall considered this as a perfect model of the organization, which disposes to philosophical studies. The organ of Language is unusually large.
- 312 R. R. Jones, of Liverpool. Language very large. Reflective organs small. Jones was distinguished for his love of the languages, although his intellect was inferior.
- 313 Idiotic Woman.
- 314
- 315
- 316
- 317 W. M. Goodrich. Organ builder of East Cambridge. Mr. Goodrich was celebrated for the superiority of his instruments; they were famous for the excellence of their tone, as well as for the excellence of their construction. Benevolence, Tune, and Constructiveness large.
- 318 George Flagg. Artist.
- 319 Pindar. From the Antique.
- 320 ——— Stone. Architect. Size, Locality, and Number large.

- 323 N. S. Josselyn. Portrait painter. Large Size, Locality and Imitation.
- 324 Martin Martins. Large Ideality and reflective organs.
- 325 President Day, of Yale College. Order, Locality, Individuality, and Language large.
- 326 G. Barnet.
- 327 Professor Taylor, of Yale College. Ideality large.
- 328 H. Harrison.
- 329 John Mansfield.
- 330 David Gould. Individuality, Locality, Order, and Size, large.
- 331 William H. Brown. Distinguished for his remarkable skill in cutting profile likenesses of the whole person. Large Size, Form, and Constructiveness.
- 332 Abraham Courtney. A blind man, well known in Boston ; remarkable for his love of travelling, and his faculty of finding places, being familiar with all the streets and lanes in Boston, Cincinnati, and New York. Since he was blind, he has travelled by himself in nearly every State in the Union. Organ of Locality uncommonly large.
- 333 Napoleon. Taken by Dr. Antommachi after death. See report on file.
- 334 Large Order.

SCULLS AND CASTS OF SCULLS.

- 335 SPURZHEIM. From a mould made for the Society, by Dr. Nathaniel B. Shurtleff.
- 336 Base of the anterior part of the cranium of

- Spurzheim; taken from the original skull, in order to show the size of the frontal sinus, and lower part of the anterior lobes.
- 337 Interior of the skull of Spurzheim. This cast is inaccurately taken, being half an inch too high.
- 338 Obstinate man. Firmness very large.
- 339 Once erroneously supposed to be a cast of the skull of Raphael. Benevolence, Imitation, and Constructiveness large.
- 340 Milliner of Vienna. Constructiveness and Love of Approbation large. She was known to Dr. Gall as very expert in her trade.
- 341 The Austrian General Wurmsier. He commanded the Austrian army in Italy, and was defeated by General Bonaparte. He was endowed with prodigious courage. This, and attachment to his friends formed prominent traits in his character. The organs of Combativeness and Adhesiveness are remarkably large, and Cautiousness small.
- 342 Timid Female. Dr. Spurzheim used to show this in contrast with that of Wurmsier. The organ of Combativeness being small, and Cautiousness largely developed.
- 343 Dr Hette, of Vienna. Remarkable for cherishing an antipathy to the society of women. He was also timid, and lived always alone, or in houses inhabited only by old men. The cerebellum is small, and the organs of Secretiveness, Cautiousness, Hope, Reverence, and Approbativeness, large.
- 344 Bichat. Celebrated anatomist. His favorite theory was that there should be perfect symmetry in all things. His skull is remarkable for want of symmetry in the hemispheres.
- 345 Top and base of a remarkably thick skull of

a woman, who, at the age of fifty enjoyed the use of all her faculties. From this period her seull thickened gradually by disease, and her faeulties beecame impaired in the same ratio, until she died at the age of sixty. The average thickness of her seull is about one inch.

346 Whitefield, the ecelebrated preacher. Taken from the original seull at Newburyport. See papers on file.

347 Mr. S———. Mirthfulness large. Hope small.

348 Preparation of the *fulx* and *tentorium*. Prepared by Dr. Nathaniel B. Shurtleff. The seull is that of an aged negro.

349 Male seull.

350 Female seull.

351 Female seull.

352 Gibbs, the pirate, who was exeecuted in New York a few years since.

353 Wamsley, his coadjutor, who was convieted for the same erime, and suffered at the same time.

354 Madeline Albert. A young girl of Moulines, in Franee, who, for some trifling provocation, killed her mother and two sisters with a hatehet. She afterwards showed no contrition for the erime.

355 Hindoo.

356 Chinese, of Tartar race.

357 Egyptian Mummy.

358 Peruvian. Baek part of the head flattened.

359 Carib.

360 New Hollander.

361 Bengallee.

362

363 North Ameriean Indian, who was shot many years since while prowling round a house in

the interior of Massachusetts. Combativeness, Destructiveness, and Secretiveness uncommonly large. Benevolence deficient. See report on file.

- 364 A Choctaw Indian, obtained about three hundred miles above Natchez. This is believed to be a fair specimen of this tribe of Indians, who are extremely degraded, manifesting in their character no love of approbation.
- 365 A cast taken from the skull of an Indian of the Wyandot tribe, in Mr. Dorfeuille's Museum, Cincinnati.
- 366 A cast taken from the skull of Pepick, a distinguished Winnebago Chief, who was killed at Chicago, in 1812, at the head of a party of his tribe by the American troops.
- 367 This cast was taken from one of three similarly marked crania in the possession of S. Willis Pomeroy, of Cincinnati. He procured them five miles above the Great Kanawha on the Ohio River. There are good reasons for supposing it to be a specimen of the Shawnee tribe of Indians.
- 368 A cast of a skull obtained from an Indian burying ground about two and a half miles in the rear of Natchez. Several skulls were obtained at the same time; they were found in a horizontal position, with the right hand extended by the side, and the left hand placed across the breast. They are supposed from various circumstances, to be the crania of the Natchez Indians.
- 369 A cast of a skull taken from a mound in Cincinnati, Ohio, and supposed to be a fair specimen of the crania which properly belong to the mounds of our country. It is called by

Dr. W. B. Powell, to whom the Society is indebted for these valuable casts, the "Monumental Indian."

- 370 A Peruvian Indian. Obtained from a cemetery, in which no interments have been made since the conquest by Pizarro, near a Temple of the Sun, about twenty miles to the Southward of Lima. The organization very closely resembles that of No. 369, which Dr. P. calls the "Monumental Indian."
- 371 Said to be that of a North American Indian. Probably a Peruvian.
- 372 Indian skull, found in an Indian burying ground in Georgia. Supposed to have been buried several centuries. Constructiveness large. See report on file.
- 373 Skull of North American Indian.
- 374 Delgado. One of the pirates, who robbed the Mexican, and who committed suicide in Leverett street jail, in Boston. See report by Mr. Fowle, published in the 2d vol. of Annals.

CASTS OF HEADS.

90 Ostinelli. Musician.

391 Chevalier de Lyon. He was the poisoner of many women.

392 Boutillier. He was executed at Paris, for murdering his mother, in order to obtain her titles and property. Having perpetrated the crime, he assumed a false name, but being convicted of various robberies, he was condemned to the galleys, and there recognised as the murderer of his widowed mother. Dr. Gall says that "this head is remarkable for an extreme development of the organs from which arise the worst propensities,—(Secretiveness, Acquisitiveness, and Destructiveness); while at the same time the organs of intellect, and of their superior sentiments are deficient."

393 Martin. Murderer of his father. Firmness, Self-Esteem, Acquisitiveness, and Destructiveness large. He was remarkable for his insubordination and extreme obstinacy.

394 Charles D'Autun, (ex-military surgeon); head cast from nature. Autun was executed at Paris, for the murder of his brother, whom he cut into parts and distributed over Paris, hoping thereby to render the search of the police more difficult, and to impress the belief that the scattered limbs were parts of anatomical subjects. His object was to be sole heir of the little patrimony left by his father. His

trial brought out that he was a false, dissembling, and covetous character. Dr. Gall says, that "the organ of Acquisitiveness is developed in a remarkable degree, and that of Secretiveness is also large."

- 395 Antoine Le Blanc. Cast of the head after death. Le Blanc murdered the family of Mr. Sayre, in Morristown, N. J., that he might, by procuring the property, be able to marry a young woman in his native country. The organs of Destructiveness, Secretiveness, and Acquisitiveness were enormously developed in his head. That of Adhesiveness is large; but those of the perceptive faculties are very deficient.
- 396 Gibbs, the Pirate. Destructiveness very large.
- 397 John Pallet, (murderer of Mr. Mumford); cast of the head after death. This cast is marked according to the former marking of Mr. Combe. For a very full account of Pallet, see the Ed. Phren. Journal.
- 398 Cæsar Reynolds; cast of the head after death. This negro was executed at Hartford, Conn., for the murder of the keeper of the Connecticut State Prison. His head is remarkable for the size of the occipital region, and the smallness of the sincipital. The organs of Firmness and Destructiveness are very largely developed. Those of the reflective faculties are small, while those of the lower perceptive are rather large.
- 399 William Teller; cast of the head after execution. Teller was the accomplice of Cæsar. His head shows a larger development of the reflective faculties, though smaller affective. Teller, it is said, first conceived the idea and devised the plan of escaping from prison. It

was his intention that the keeper should have been gagged, but Cæsar, who was chosen to carry the plan into execution, was not content with doing this, but under the influence of his destructive feelings, committed the murder, for which both atoned, by the last punishment of the law.

- 400 Mark Winslow. Notorious for manufacturing and altering counterfeit money. Sentenced to State Prison for life, but cut his throat in Leverett street jail. Secretiveness very large. Hope small.
- 401 Henry Joseph; (the murderer of Captain Crosby, executed at Boston, December 2, 1834.) In the head of Joseph, more commonly known as the *black cook*, the organs of Self-esteem, Love of Approbation, Combativeness, and Destructiveness are largely developed.
- 402 Luigi Amari. A cast of the upper part of a head, presented to the Society by Baron Pisani of Sicily. This is a remarkable head. The individual was supposed to be insane. The organs of Causality, Comparison, Reverence, Combativeness, Amativeness, and Destructiveness are very large, and Cautiousness, Conscientiousness, Hope, and Love of Approbation very small.
- 403 Brown, executed at Providence, 1834, for highway robbery.
- 404 Amos Miner, executed at the same time and place with Brown for murder.
- 405 Major Mitchell. This boy is now in the State Prison, of Maine, undergoing the sentence awarded him for his cruelty. Destructiveness is very large. See Annals, Vol. II.
- 406 Idiot girl, who died at Cork, aged 17.
- 407 Idiot man, who died at Amsterdam, aged 25,

- ✓
- 408 Dr. Gall. From a cast said to have been taken by Spurzheim. It is believed to be a correct likeness.
- 409 W. B. Fowle, Esq.
- 410 Penniman. Ornamental Painter.
- 411 Francois Cordonnier. Poet.
- 412 H. J. Finn. Comedian. Comparison very large. Back part of the cast inaccurate.
- 413 Henry Mackenzie. Author of Man of Feeling.
- 414 Asa Low, Esq. Paper manufacturer in Vermont. Organs of Causality, Mirth and Acquisitiveness remarkably large. See report on file.
- 415 Professor Nuttall. Naturalist.
- 416 Dr. Benjamin Rush. Intellectual organs, and Love of Approbation very large. See report on file.
